Central Station Video Alarm Instruction Form

The following instructions must be provided to the C.S. for every Video alarm installation

What action should the central station take when receiving:

1. Video alarm event showing HUMAN movement, (*person(s) in the video*) -
2. Video alarm event with vehicle/machinery/product movement within protected area -
3. Video alarm event with no obvious movement, or w/ animal(s) in video - (*no human(s) in video*) -
4. Video alarm event with no video, no picture, but with an alarm event indication only -
5. Panic alarm - (*from the red panic button on the Videofied keypad*) -
6. Tamper event - (*cover of device has been removed*) -
7. Supervisory, Radio Supervisory, Low Battery signals, Failed Periodic Test – all possible indications of a failed component or failed (or soon-to-be failed) system -

In addition, please provide email addresses for all who will need to have the video event(s) emailed to them.
